QUICK START MANUAL

SCHBro is a free tool for researcher to quickly find some information in the website. This tool contains three parts – mainwindow and notification icon. Now we will quickly take you around.

Mainwindow

In the mainwindow, we can see the textbox at the top of the window. You can enter whatever you want to search or just click the textbox the application will automatically paste the last text in your computer clipboard. Then you can click "GO" or just press enter, the application will show the result in the browser bellow.

Besides the textbox is the check comb. Here you can choose your search engine. Now we provide the following search engine:

METHOD	URL
Scholar	http://scholar.google.com/
Wikipedia	https://en.wikipedia.org/
Google	https://www.google.com/
Baidu	https://www.baidu.com/

URL	Directly jump to the URL

Other search engine will be added soon.

"TOP" button allows the application to stay at the top of other windows. (shortcut **Ctrl+T**)
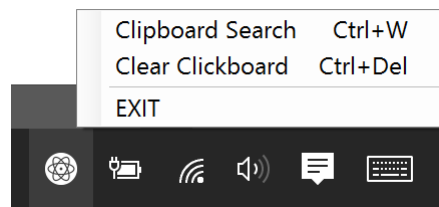

"OpenOUT" button allows to open current pages outside SCHBro with system's default web browser. (shortcut **Ctrl+Q**)

Notification icon

Notification icon shows like

One click will allow the application directly search for the latest item in the clipboard and show the result in the browser in the SCHBro window. Double click will call the menu with following option:

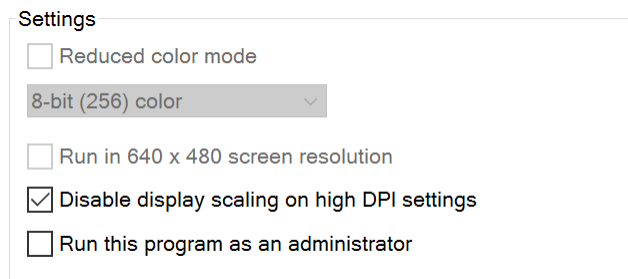

"Clipboard Search" button have the same function with the single click;

"Clear Clipboard" button will clear everything in the clipboard. You will feel it really helpful when you want to copy something from the textbox in the SCHBro.

"EXIT" button enables you to quit the application directly.

Known issue

In some computer with high resolution display, the application will be scaled based on the preference. To make the program work properly, please go to the application install location and find the program "SCHBro.exe". Then right click to open the property window. Then in the "compatibility" tab choose "Disable display scaling on high DPI setting" like the following.
